

GENERAL MOTORS LIST OF RECOGNIZED EMC LABORATORIES

Revision Date: 21 Oct 2015

GM Contact for Lab Recognition:
 Michael Mandziuk
 Ph: 248-794-0377
 Email: michael.mandziuk@gm.com

Alternate Contact:
 Donald Seyerle
 Ph: 248-534-9642
 Email: donald.r.seyerle@gm.com

Row Color of YELLOW indicates a lab that has not responded to recent communications. If you have updated lab contact info, please send it to michael.mandziuk@gm.com

Labs without updated facility reports and CI plots will turn yellow in February 2016.

Labs in yellow will be removed from this list in Q2 2016.

Row Color of WHITE Denotes a Supplier Lab

Row Color of GREY Denotes a Commercial Lab

CI Procedures for Existing Labs will Show "SEE NOTE" until an updated facility report is provided with verification plots and setup photos. Use of this lab is at the discretion of the GM EMC engineer for each component being tested.

INFO

- You can filter the list by lab type, region, country, and/or state/city by clicking on the arrows next to the applicable column headings.
- Laboratories gain recognition for each test method and each test setup individually.
- The test methods are labeled in column headings by GMW3097 section numbers. The recognition status for a given test procedure is shown below the respective column heading, corresponding to the lab specified in each row.
- Cells labeled "YES" indicate that the lab has at least one test setup that is recognized by GM to meet AEMCLRP requirements. Each cell designating recognition status will have a comment (mouse over the small triangle in the upper right hand corner of the cell) that lists the particular test setups that are recognized. "SEE NOTE" means that the lab may have some limitation to performing the test. The details are in the Notes column to the right. "NO" indicates that the lab is not currently recognized for that particular test method. "SUSPENDED" indicates that there is a potential issue and test results for certain, possibly all, test setups may not be used for validation purposes.
